### INTRICATE PAPER-CUT ARCHITECTURE COLLAGES BY LUCY WILLIAMS

At first glance, these images of modernist architecture look like photographs or computer visualizations. But in fact, they're meticulous handcrafted paper collages, created by British artist Lucy Williams. The pieces, which depict scenes of deserted mid-20th century modernist architecture, typically start out as a detailed drawing. Then, the artist begins cutting out shapes from a variety of materials, including paper and cardboard, and carefully combines elements.

See more about how the London-based artist works in the video [here](#).
